NGÔ MINH THIÊN

SOFTWARE ENGINEER

Phone: 0987176434
Email: minhngothien1@gmail.com
GitHub: https://github.com/phuocthien412
Address: Phu Thuan ward, Ho Chi Minh City

CAREER OBJECTIVE

Full-Stack developer capable of integrating AI and multi-agent architecture to drive automation. I deliver production-ready solutions in enterprise environments, prioritizing maintainable code and high-performance architecture. I aim to contribute and promote technical excellence in large-scale software projects.

SKILLS

- Database: MongoDB, MySQL.
- Tools: Figma, Postman, Docker.
- Languages: C#, Java, PHP, Python, JavaScript
- Front-end: React, Bootstrap, Tailwind CSS.
- Back-end: Node.js, ASP.NET Core, Spring Boot.
- CMS & Platforms: WordPress.

WORK EXPERIENCE

AITC - Asia Information Technology Center *Aug 2025 – June 2026*

At AITC, I established my value as a Full-Stack Developer by building and operating stable enterprise software systems. I boosted productivity by leveraging AI to accelerate technical research and rapidly master new technologies, ensuring projects remained on schedule.

Tân Hòa Chatbot Project: As a new member, I quickly integrated into the team by leveraging AI to master new languages and accelerate development, successfully engineering a high-performance dashboard to visualize real-time chatbot logs..

Official Website AITC: Deployed the company's official website **(aitc-jsc.com)** using WordPress, utilizing AI to implement sophisticated JavaScript effects that enhanced visual appeal while ensuring SEO optimization and full responsiveness.

QR CODE - ECARD: Developed an event management platform featuring QR-integrated guest tracking and personalized E-card generation, while utilizing AI to design high-end interactive popups for seamless guest check-ins..

Equipment Management System: Deployed a production-ready device management system featuring hardware comparison tools and automated maintenance monitoring. Leveraged AI to optimize hardware specification analysis and intelligent field filtering during Excel imports, transforming raw data into a highly searchable and professional user interface.

EDUCATION

University of Technology Ho Chi Minh City (2021 - 2025) GPA: 3.21/4.0
Major: Software Engineering
